

HVA45TD

the smallest VLF test system of its performance class
with integrated Tan Delta Diagnostics

- VLF and DC output
- Sheath Test
- Sheath Fault Location Mode
- Vacuum Bottle Test
- PD system upgrade available
- Insulation Testing

The HVA45TD is a truly compact and portable VLF test set system for testing medium voltage cables. It performs **VLF** and **DC** testing, **sheath testing with sheath fault location mode** and **TD leakage current correction** (guard terminal) is included. Assessments of cable condition can also be carried out by use of **Tan Delta Diagnostics**.

New - the recently introduced **Monitored Withstand Test (MWT)**, a combination of Withstand Testing and Tan Delta Diagnostics in compliance with IEEE 400.2-2013, can be performed.

Performance - the HVA45TD offers outstanding features in terms of size, weight (39 kg) and performance (max. 10 μ F).

Safety - the instrument has two independent earthing devices (electronic and mechanical discharging) and an integrated 12 kV feedback protection system to protect both operator and instrument.

Field use - a watertight and very rugged case with a protection class of IP67 makes additional transport boxes obsolete.

Connectivity - on site, no external PC is needed. All results can be downloaded later by USB or Bluetooth for further investigation and easy report creation on the PC Software.
